Update following 2020 Annual General Meeting

Mediclinic International plc, a diversified international private healthcare services group, refers to the outcome of the voting which took place at its July 2020 annual general meeting ("**AGM**") in relation to the resolution to authorise the directors to allot ordinary shares (Resolution 18), which received 79.65% support from shareholders.

The Company seeks to maintain regular dialogue with its shareholders to establish an open forum for discussion on key market and Company-specific matters, and values the time shareholders have made available to engage with the Company since the 2020 AGM.

In relation to Resolution 18 to authorise the directors to allot ordinary shares, the board of directors ("**Board**") notes that the voting outcome reflects the differing market practice between the United Kingdom ("**UK**") and South Africa, where shareholders in the latter jurisdiction usually approve more restricted levels of authority to issue shares and prefer to vote on the proposed allotments of shares on a case-by-case basis.

Most South African shareholders acknowledge that they operate under policies that do not permit support of the standard UK level of authority to allot ordinary shares, although a number do understand the Company's position. As Mediclinic is a UK premium-listed company, the Board considers it appropriate to seek authorities in line with the UK's Investment Association's Share Capital Management Guidelines to: (a) allow the Company to respond to market developments; and (b) enable allotments to take place to finance business opportunities as they arise. The views of all shareholders are important to Mediclinic and the Board will continue to engage with South African shareholders on this topic, however, as the voting outcome reflects the difficulty in balancing the expectations of different markets, it is possible this outcome continues.
